PROFESSIONAL SUMMARY

Areas of professional expertise:

- JavaScript, Typescript and Node
- React and React Native
- Git and Github
- Knowledge of DevOps
- Postgres, MongoDB and Firebase
- Problem solving and IT Consulting

PROFESSIONAL SKILLS DEMONSTRATED

[Convierte+](#), [Coolto](#)

September 2020 – December 2020

React Native Developer

- **Lead:** I was tasked with the development of the app based in the web version of the school as well as the choice of the stack of technologies that would be used for development.
- **React and Node:** Using advanced JavaScript concepts and powerful tools like React Navigation and Expo, I coded the entire UI of the app, managed the state with Context (switched to Redux in core parts of the app when necessary) and made everything responsive for both Android and IOS.
- **Backend:** Connected the app with the REST api for displaying the courses, modules and lessons like the web version, including requests to the database and displaying of media. Used Postman to test the endpoints.

[Nova Helm team](#)

August 2019 – September 2020

Full-Stack Developer

- **SCSS:** I manage the configuration and general styles of the projects with Sass preprocessor for CSS.
- **JavaScript:** Wrote the logic using modern JavaScript and best practices, as well as managing the libraries that the project needed.
- **Responsive Web Design:** Wrote the CSS queries and prepared the design for mobile and tablets

Lifetech, [Power Works](#), Filands

March 2020 – September 2020

IT consultant and technical support. Later Frontend Developer

My job was to solve any IT problems that appears, managing the servers of the pages, emails and more. I also gave technical advice, defined the stack of the companies, programmed power-works.net and cleaned the old build of lifetechwww.com to rebuild it without WordPress. I deployed all the websites using Filezilla, and managed the cpanel ftp accounts and business emails.

OPEN SOURCE

[Ace Clothing E-commerce](#)

Full-Stack Developer

Personal Project made with React, React-Router, Redux, Firebase, SASS and Stripe payments. Fully functional E-commerce with user login, sign-in and authentication, cart and payments with a test card. Deployed to Heroku.

Template Studio – Added a feature: Open source React project in which I added a hyperlink for Github donations with SVG and Styled Components code.
